AVAILABILITY

The new System3 Heavy Body range, powered by Cryla, has been reformulated to offer more pigment and more power than ever before.

System3 Heavy Body acrylic is ideal for achieving textured effects and using impasto techniques. It retains brush marks, holds its shape, allows the creation of motion and adds volume to artwork.

The high pigment load used gives it excellent colour strength, permanence, lightfastness and covering power. The heavy body range consists of 27 colours that match the System3 Acrylic palette making it ideal for mixed media use.

Discover the complete System3 Acrylic suite of perfectly compatible products.

§ For technical reasons the printed colours do not match 100% the painted colours, but deliver the best possible reference point.
